YOU MAKE US GROW

Pattyn values its employees and customers. Thanks to you we are able to grow year after year, which results in a period of expansion. Recently we welcomed a new management member and many new employees in the service and production department. In January 2015 we will start with the construction of new Pattyn offices, located next to our production hall.

As part of our growth strategy we keep exploring new markets worldwide, keep developing new box lining solutions according to your needs and keep joining international and local exhibitions in specific regions.

Come and visit us at our factory in Bruges or at one of the upcoming shows of which you find an overview on the last page. We look forward to welcoming you.

Paul Pattyn
Managing Director
Pattyn Packing Lines NV

New Pattyn Office

As a result of consistent growth the past few years, Pattyn experienced the need for a new office. We had the opportunity to obtain the required surface for a new office building next to our production hall. Plans have been designed and the construction will start in January 2015. This new office will have spacious meeting rooms and additional training rooms in order to further enhance the ability to support you and our Business Partners worldwide. The move is planned for beginning 2016.

New Pattyn Management member

We are pleased to announce that we have a new Management member who has joined Pattyn Packing Lines. Benjamin de Chilly joined our company on 25th of August 2014 as Finance and Operations Director.

Benjamin's role is principally targeted towards managing the production flow and creating more synergy between the

3 companies of the Pattyn Group.

Benjamin de Chilly was previously Managing Director at De La Ballina and has many

years of experience in the food and packaging industry.

C-ZIM-11 PERFECTLY CONTROLLED CASE ERECTING AND BAG INSERTING

The newest machine in the Pattyn program, which has been launched at the Interpack exhibition, is the C-ZIM-11 combined case erector – bag inserter. This combined machine offers a good solution for food and non-food processing companies looking for a small but intelligent solution to automatically make boxes and insert bags.

MOST COMPACT, COMBINED CASE ERECTOR – BAG INSERTER

The C-ZIM-11, running up to 6 cases a minute, is the most compact case erector - bag inserter on the market and requires a floor space of only 2,2 x 2,3m.

FULLY AUTO-ADJUSTABLE

Standard equipped with fully automatic format change, the C-ZIM-11 offers maximum operator convenience. When running only 1 footprint with different case heights, the case erector - bag

inserter automatically adjusts the bag length according to the appropriate case height. Running multiple footprints the machine automatically switches from one footprint to another, which eliminates operator errors.

AUTOMATIC FILM ROLL EXCHANGE

Thanks to the automatic film roll exchange device a new roll can easily be loaded while the C-ZIM-11 is still running, guaranteeing a continuous production process.

COMPLETE SOLUTIONS

According to your requirements, Pattyn Packing Lines offers the C-ZIM-11 as stand alone machine or integrates the machine in a fully automated Pattyn packaging line, from case erecting to case closing.

LOWEST PACKAGING COST USING BAGS FROM A REEL

With the Pattyn bag inserter and combined case erector – bag inserter you minimize your packaging cost, using made-to-measure bags from a reel.

Testimonial

“The fully automated Pattyn line is a 100% reliable packaging system, combining the required capacity with high accuracy”.

Ets ABDELMOULA SA (TUNISIA)

Nabil Ghenima,
Plant Manager

ETS ABDELMOULA is a Tunis based company active in the vegetable oils & fats sector and owned by the Abdelmoula family. As an ISO 9001 and ISO 22000 certified organization they continuously work to improve their business. Today Ets Abdelmoula offers a wide range of products derived from the processing of oils and fats with specific and custom characteristics, using soybean oil, rapeseed, palm kernel oil, palm oil or coconut oil. In order to meet the growing demand of their customers, they were looking to renew their packaging equipment.

Nabil Ghenima explains:

“The existing packaging line was manually operated and did not allow

us to get the quantity and quality our customers were asking for. We had to look for a solution that would upgrade both the capacity of our line and improve the quality of the packed products. Pattyn Packing Lines was recommended by our processing equipment supplier. After the first contacts and some first discussions with Pattyn, we were invited to visit their premises in Bruges. We were highly impressed by the company and after a company visit and a reference visit in the Bruges area we were convinced that Pattyn is the specialist we were looking for.”

“We decided to go for a complete new line to pack our vegetable oils & fats into 25kg boxes. Pattyn proposed a fully automated solution, including a combined Case Erector – Bag inserter Ceflex-21, a 2 head weigh filler AVL-22 and a DS-11 bag sealer. Pattyn’s Sales Manager, Mr. Karel Vanduynslager, visited our factory in Tunis to check the lay-out and to

discuss all technical details.”

“In addition, we were very satisfied with the professional support of Pattyn’s project manager, Mr. Serge Dewyse, and the installation on site by their service engineer, all in compliance with the technical specifications we required.”

“We have now a 100% reliable packaging system, meeting the challenges we had set before. The Ceflex-21, equipped with a hot melt device, offers perfectly closed bottoms and well inserted bags. With the DS-11 bag sealer, providing leakproof sealed bags, our oils & fats are now perfectly packed”, concludes Nabil Ghenima.

“We were very satisfied with the professional support of Pattyn’s project manager and the installation on site by Pattyn’s service engineer”

PRODUCT & CONTAINERS

- Vegetable oils & fats, packed into 25kg boxes

CHALLENGE

- Increase line capacity
- Improve quality of packed products

RESULTS

- Fully automated semi-liquid line, operated by one man
- Time savings
- Accurate and stable filling process
- Perfectly sealed bags
